Description

Front End Developer with a focus on creating the best user experiences

I am a former law student but made a choice to transition into development to follow my passion for technology. I am a proponent of clean intuitive design, following best practices, and performance driven applications. I am very detail oriented, and have a strong passion for technology and it's use for improving and optimizing the lives of others. I also am an avid fan of music, movies, animals, and pick up games of basketball with friends.

EDUCATION

WDI | General Assembly — Graduated 2013

Bachelor of Arts | Oakland University — Graduated 2011

SKILLS

JavaScript | BackBone | Angular | React | jQuery | HTML5 | CSS3 | Ruby | Rails | Python | Django | AJAX | SQLite | PHP | Underscore.js | Node.js | D3.js | Git |BootStrap

EXPERIENCE

Front End Engineer (Contract) | **The Clorox Company** — May 2015-Aug 2015

- Designing software applications using HTML, JavaScript, CSS and working with PHP.
- Prototyping new product features, to be incorporated across a wide range of Clorox products.
- Built Fantasy Football Promotional Site, Coupon Manager, and Image Picker

Web UI Developer | **EGain Corporation** — Jun 2014-Mar 2015

- Project Lead on multiple projects responsible for implementing designs and customizations to the existing applications using HTML, JavaScript, CSS and building out new features to give each Client a product that suits their feel.
- Worked as project lead - managed eight developers creating information center tools.
- Created a jQuery library for improved performance and responsive layout.
- Working with the product team to maintain existing production code in the field while developing and delivering enhancements to existing clients and products to the new clients.

Front End Engineer (Contract) | **MomentDeals** — May 2014-Dec 2014

- Work with the founders and other team member to build out the core functionality of our application while also mentoring junior developer and performing code reviews.
- Building out a product from the ground up using Angular.js while also working closely with designers to improve the look and feel of the end product.

Developer In Residence | **General Assembly** — Dec 2013-Apr 2014

- Assisting instructor and students for Front-End Web Development course resulting in students learning fundamentals of front-end development.

Lead Developer | **ChangeMakrs Inc** — Aug 2013- Dec 2013

- Maintaining and building out new features for the Rails application, also improving test coverage across new and existing functionality.

Freelance Development | **Sharif Hadidi Development**

Aug 2013-Present

- Bohemian Rabbit – Site redesign, adding in responsive design, and modern features.
- OddJob SF – Built a photo booth application with the ability to upload directly to Dropbox.
- Logisome Inc – Assisted in the UI/UX redesign of both site as well as iOS application.
